TRANSONIC FLUTTER SUBJECT INDEX

Special Course on Subsonic/Transonic Aerodynamic	TRANSONIC SPEED	A course of advanced to the course account of
Interference for Aircraft	Transonic drag rise and drag reduction by active/passive	A review of advanced turboprop transport activities p 70 N86-11148
[AGARD-R-712] p 19 N84-12072	boundary layer control p 85 N86-15275	Problems of the integration of propellers in airframes.
Subsonic/Transonic Aerodynamic Interference for Aircraft Introductory remarks p 20 N84-12073	TRANSONIC WIND TUNNELS Operational experience with the National Transonic	especially for high performance twin-engine aircraft p 73 N86-11165
Subsonic/transonic viscous interactions	Facility p 32 N84-23565	Design considerations for application of taminar flow
p 20 N84-12075 Transonic empirical configuration design process	The European Transonic Windtunnel (ETW)	control systems to transport aircraft p 84 N86-15270 identification of aircraft characteristics including gust
p 20 N84-12079	p 32 N84-23566 A review and an update of the FDP Specialists Meeting	induced dynamic effects p 148 N86-27263
Application of an inviscid-viscous interaction method to transonic compressor cascades p 100 N84-16190	(London) on Wall Interference in Wind Tunnels	TRAVELING WAVES Waves on vortex cores and their relation to vortex
A coupling method for the inverse mode calculation of	p 33 N84-23570	breakdown p 80 N84-12128
transonic internal flows with a shock wave	A short note on recent advances in the adaptive wall technique for 3D-model tests at the TU-Berlin	TRIBOLOGY
p 101 N84-16194 Two-dimensional wind tunnel wall interference	p 33 N84-23571	Gears and Power Transmission Systems for Helicopters and Turboprops
(AD-A138964) p 81 N84-20499	Turbulent diffuser flow studies related to the design of the ETW diffuser p 33 N84-23572	[AGARD-CP-369] p 91 N85-23765
Transonic shock interaction with a tangentially-injected turbulent boundary layer p 54 N85-16796	Disturbances from ventilated tunnel walls in aerofoil	Chemical-mechanical interaction in gears p 94 N85-23785
Transonic Unsteady Aerodynamics and its Aeroelastic	testing p 33 N84-23573	Wear reduction by lubricants in confined contacts
Applications	High Reynolds number tests of the cast 10-2/DOA2 transonic airfoil at ambient and cryogenic temperature	p 94 N85-23786
[AGARD-CP-374] p 63 N85-25171 Transonic pressure distributions on a two-dimensional	conditions p 33 N84-23575	TROPOSPHERE D-1 statistical model of tropospheric multipath
0012 and supercritical MBB-A3 profile oscillating in heave	Prediction of condensation onset and growth in the European Transonic Wind Tunnel (ETW)	propagation p 168 N84-24944
and pitch p 63 N85-25173	p 34 N84-23578	A GaAs refractometer for tropospheric studies
Numerical studies of unsteady transonic flow over oscillating airfoil p 63 N85-25174	Design of advanced technology maneuvering aircraft	p 170 N84-24952 D-19 evaluating the height of tropospheric conduction
Analysis of transonic aerodynamic characteristics for a	models for the National Transonic Facility p 36 N84-23590	of evaporation p 171 N84-24962
supercritical airfoil oscillating in heave, pitch and with oscillating flap p 64 N85-25175	Design of a wind tunnel afterbody model for the	Considerations pertinent to propagation prediction methods applied to airborne microwave equipment
Calculation of harmonic aerodynamic forces of aerofoils	development of a transonic combat aircraft	p 172 N84-24970
and wings from the Euler equations p 64 N85-25177	p 36 N84-23591 Pressure distributions measured on research wing M100	Propagation of wide bandwidth signals in a tropospheric
Calculation of unsteady transonic separated flows by viscous-inviscid interaction p 64 N85-25178	mounted on an axisymmetric body p 81 N85-10023	ducting system p 173 N85-19271 Media effects on systems in the high latitude region
A semi-empirical unsteady transonic method with	Pressure distributions measured on research wing M86	p 181 N86-27533
supersonic free stream p 64 N85-25179 Improvement and extension of a numerical procedure	mounted on an axisymmetric body p.81 N85-10024 Design and construction of models for the National	TROPOSPHERIC SCATTERING
for the three dimensional unsteady transonic flows	Transonic Facility, part 1 p 133 N86-20419	Influence of propagation in digital wireless beam, microwave links p 174 N85-19277
p 65 N85-25181	Design and construction of models for the National Transonic Facility, part 2 p 133 N86-20420	Measurements and predictions of multipath dispersion
Application of time-linearized methods to oscillating wings in transonic flow and flutter p 65 N85-25182	The T2 cryogenic induction tunnel in Toulouse	for troposcatter links p 175 N85-19289
Computation of unsteady transonic flows about	p 134 N86-20424	Media effects on systems in the high latitude region p 181 N86-27533
two-dimensional and three-dimensional AGARD standard	The European Transonic Windtunnel (ETW) project p.134 N86-20427	TUNING FORK GYROSCOPES
configurations p.65 N85-25183 Calculation of unsteady transonic flow around a high	The NASA Langley 0.3-m transonic cryogenic tunnel	Strapdown inertial systems for tactical missiles using mass unbalanced two-axis rate gyros
swept wing p 65 N85-25184	p 134 N86-20428	p 87 N84-25696
Unsteady transonic aerodynamic and aeroelastic calculations about airfoils and wings p.65. N85-25185	The US National Transonic Facility, part 1 p 134 N86-20429	TURBIDITY
The development of unsteady transonic 3-D full potential	The US National Transonic Facility, part 2	Effect of multiple scattering on the propagation of light beams in dense nonhomogeneous media
code and its aeroelastic applications p 65 N85-25187	p 134 N86-20430 Other cryogenic wind-tunnel projects	p 171 N84-24959
Data set 9 LANN wing Pitching oscillation p.82 N85-31030	p 135 N86-20431	TURBINE BLADES Compressor and turbine blade boundary layer
An elliptic calculation procedure for 3-D viscous flow	TRANSPORT AIRCRAFT	
		separation p 101 N84-16196
p 196 N85-32297	Flutter and steady/unsteady aerodynamic	Potential of metal-matrix composites as superalloy
p 196 N85-32297 Aerodynamic method used in France for advanced fast	Flutter and steady/unsteady aerodynamic characteristics of supercritical and conventional transport wings p.117 N83-22218	Potential of metal-matrix composites as superalloy substitutes p 150 N84-33474

PERSONAL AUTHOR INDEX

AGARD INDEX OF PUBLICATIONS (1983-1985)

Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by nersonal author. The title of the document provides a brief description of the subject matter. The report number helps to indicate the type of document cited. The page number identifies the page in the abstract section (Part 1) on which the citation appears while the NASA accession number denotes the number by which the citation is identified on the abstract page. Under each author's name, the titles are arranged in accession number order.

AARONS, J.

Equatorial transionospheric propagation conditions affecting digital communications p.173. N85-19275 F layer irregularities at plasmapause and auroral attudes p. 181 N86-27537

ABBOTT, W. Y.

copter simulation validation using flight data p. 11 N83-30372

Dynamic wind-tunnel testing of active controls by the NASA Langley Research Center p. 61 N85-22353 ABRAHAMSON, J. A.

Status of the National Space Transportation System

ABSHIRE J. B.

Remote sensing of atmospheric pressure and sea state from satellities using short-pulse multicolor laser altimeters p 206 N84 15674

I, V. westigations on four-dimensional guidance in the p.87 N83-22187 Guidance and control research flight testing with HFB 20 test aircraft p 62 N85-22355 320 test avcraft

ADEN, T. C.

hypervelocity missile Based on the concept of aircraft/missile integration for maximum firepower p.16 N84 12058

AGHINA, J. C. F.

hysiological and psychological aspects of the piloting of modern high-performance combat aircraft p 31 N84-15099

AGUAS, M. P. N.

Heat exchangers in regenerative gas t

Multipeth and Doppler observations during transatlantic digital HF propagation experiments p 174 N85-19281

The effect of space environment on the thermal on of polymer matrix composites p 135 N83-30484

AIKEN, E. W

A review of US Army aircrew-aircraft integration research programs
Aircrew-aircraft integration issues in n 57 NRS-16814 helicopters AKASOFU, S. I.

Solar-terrestrial relationships in the high letitude region p. 181 N86-27532

Progress in modelling the polar ionosphere from solar and magnetosphere parameters p. 185 N86.27556 AL-SAIDI, I. A.

Optical modulators and bistable devices using molecular p 23 NB5 29761

ALBUS, J. S.
Robotics Past present and future p 141 N86 19628
